Dear Care Colleagues,

Supporting frontline social care workers to receive their Covid-19 Vaccination

For the safety of social care users and care workers it is vital that all eligible social care workers are supported to take up their vaccine as soon as possible.

The Prime Minister set a target to offer vaccines to everyone in the top four priority groups, as outlined by the Joint Committee on Vaccination and Immunisation, by 15 February. This includes all frontline social care workers, including care home workers, home care workers and those working in day centres and supported living, who have close personal contact with those who are clinically at risk from COVID-19.

If you employ frontline care workers who fall into these priority groups and have not yet been contacted about supporting access to vaccination, please contact your Local Authority who will be able to confirm eligibility and support you in making the necessary arrangements. **A list of Local Authority contacts is attached.**

In addition, I am pleased to let you know that from 11th February, initially for a period of 2 weeks, all eligible frontline care workers can also access their first vaccination via the **National Booking Service**. This provides an additional option for employers and eligible frontline social care workers to access an appointment at a time and place that is convenient for them. The National Booking Service can be accessed via: <https://www.nhs.uk/conditions/coronavirus-covid-19/coronavirus-vaccination/book-coronavirus-vaccination/> or by phone: 119.

As with the current process, social care workers can access their vaccination appointment with a Local Authority-issued Notice of Eligibility. They can now also use a recent letter from their employer, along with photo identification which confirms their place of work. For those who do not have a work photo ID, as a minimum, a letter from their employer with another form of photo ID will be needed. Frontline social care workers should also be encouraged to inform their employers of their vaccination to enable this to be included in data returns to help us target support where needed.

I am aware that there may be some frontline care workers who will have questions about the COVID-19 vaccine. I am attaching a short document which provides links to some key resources which may help in any conversations you will be having with your colleagues.

Social care workers have a crucial role in providing care and support to those who need it in this country. Thank you for your dedication and hard work in enabling and supporting social care staff to have their vaccination.

Yours sincerely,

Stuart Miller
